

Dear Laszlo-

I am writing to thank you for your excellent product- the Barihab mat. In my perspective, the mat has contributed to efficiency of the staff, decreased risk of injury to staff and residents, and increased quality of life for the resident. For the resident who has not been able to stand for a long time, they are thrilled to be able to stand upright again.

At one facility that recently bought the mat, it inspired them to rearrange the gym, and to purchase several new pieces of equipment to update the entire room. The gym/equipment is so much better for the residents to improve quality of life, as well as offer a good impression when prospective family members tour the facility.

I am also appreciative of how the mat enables our residents to work on multiple issues at the same time. For example, since my passion is working with residents who have dementia, they are able to work on cognitive tasks at the same time as being in the standing frame. This is a great way to help them with motor learning, and to distract them from being in the standing frame.

The mat is a very unique piece of equipment- something different than any other mat I've seen. I appreciate your mat because it helps to improve the quality of life for our residents, as well as improve the therapists' ability to provide enjoyable and enhanced therapy to the residents.
