

As the administrator of McKinley Park Care Center I can tell you that we have several residents who can now stand who previously had been unable to stand at all for years. The resident's love the mat and I feel that having such a great piece of equipment helps my rehab staff feels proud to provide care in our facility. We also feel that the mat sets us apart in our community since nobody in Sacramento has the same mat that we've purchased so it's great to be able to tell the story to families about the mat's capabilities. And it's not just for short-term rehab patients because we have our RNA team bring in the long-term residents to also utilize our Barihab mat and they also love it.

From a financial standpoint I will say that it's great to have a piece of equipment that doesn't put us at risk for injured therapists and/or other staff members. Further, we've seen an increase in our skilled census and although it's hard to quantify the increase in direct relation to the Barihab mat, I will say that it adds so much to our facility, which helps draw more patients to the building.

And yes, I'd 100% percent recommend this mat to everyone (except my competitors in the immediate area) and I feel that it's be best investment that we've made in our rehab gym here at McKinley Park Care Center.

Thanks Laszlo!
